

**Appendix 1-1.** Registered number, locality, petrology, and foraminiferal fauna in 130 specimens kept in the Museum of Nature and Human Activities, Hyogo (MNHAH).

(A blank space of petrology is due to either only one fusulinacean individual being contained, or to small thin section too small size to designate a petrologic name. Large or small number of taxa shown in this table also largely depends on thin section size.)

	Reg. No.	Locality	Lithology	Foraminiferal Fauna
